

---

### 3 Easy Steps:

#### 1. Complete Authorized Reconditioning Center order form.

- Include Conditions & Guidelines and General Terms and Conditions.
- Send completed order form to ARC.

#### 2. Customer ships old melter(s) to ARC (with a copy of order form included in packing list).

- ARC evaluates returned melters to determine if additional investment is required to complete reconditioning.
- If additional investments are required ARC will receive authorization to proceed from customer before proceeding with the order.

#### 3. Completion of order and invoicing

- ARC forwards completed order form to the Nordson Customer Service Center for processing and invoice generation.
- ARC notifies Sales Representative of shipment. Sale Representative schedules visit with customer to assure customer satisfaction.

The Nordson logo consists of the word "Nordson" in a blue, sans-serif font, enclosed within a blue oval border.

## Authorized Reconditioning Center

---

### *Facts-At-A-Glance*

*Exclusively servicing Model IV, Model V  
and Series 2300 melters*

## Get reconditioned melters with genuine Nordson parts.

Now you can have your existing Nordson equipment reconditioned or purchase like-new reconditioned Nordson equipment through an Authorized Reconditioning Center (ARC).

Consider the advantages of a reconditioned melter:

1. Genuine Nordson Parts are featured in all reconditioned melters and provide safe and consistent operation.
2. **All reconditioned melters receive new pumps.** All hydraulic wear parts are new. All Series 2300 melters are upgraded to the SP style pump.
3. Nordson field engineers and the Nordson National Service Organization stand behind every piece of Nordson equipment.
4. Unmatched quality from Nordson, the world leader in hot melt dispensing equipment.

You also benefit from:

- Factory-trained technicians perform all reconditioning, service and rebuilding to Nordson standards.
- Teflon® coated tank for reduced maintenance and cleaning
- 90-day warranty on all reconditioned parts
- Nordson standard warranty on all new pump and new circuit board replacements
- Easy order placement

## Protect your investment.

Working with a Nordson ARC to purchase reconditioned melters or to have your existing systems rebuilt assures proper servicing that protects your investment now and for years to come.

Remember, the use of parts from other vendors may invalidate the warranty on your Nordson system because Nordson cannot guarantee the reliable function, quality and safety of non-Nordson components.

Although imitation parts may appear to cost less initially, frequent downtime and replacement can deflate your savings over time.
