

Equipment Services Program

ESP™ Equipment Services Program for rebuilding nonwovens systems saves you money and optimizes equipment performance.

Working with Nordson to have your existing systems reconditioned assures proper servicing and protects your investment with TrueBlue™ genuine Nordson replacement parts for safe and consistent operation. ESP provides a convenient way to maintain productivity and minimize downtime.

- Save up to 50 percent the cost of a new system, depending on the equipment.
- Receive a new warranty, not including wear items such as seals, modules, filters, valves and bearings.
- Obtain consistent performance from factory-trained technicians, who calibrate, test and certify that equipment meets rigorous Nordson engineering requirements and worldwide safety and quality standards.
- Fast turnaround keeps your operation running efficiently.

The program covers applicators, remote metering stations, melters and other components. Prior to rebuilding, a thorough equipment inspection verifies scope of the rebuild required to upgrade equipment to current feature and function standards. Nordson will provide a price and lead-time for approval prior to processing the order.

Equipment Services Program

Equipment	Rebuild Services	Equipment	Rebuild Services
Applicators	<ul style="list-style-type: none"> Disassemble, clean and reassemble Manifold body cleaning includes air and melt ports Replace filters, heaters, sensors and o-rings with new parts Replace modules with new or rebuilt Clean pumps on metering applicators, unless otherwise specified 	Melters	<ul style="list-style-type: none"> Disassemble, clean and reassemble entire unit, including output blocks, bypass valves and pumps Inspect heaters Recoat hopper Flush pumps Replace filters, o-rings and seals
Nozzles	<ul style="list-style-type: none"> Clean and inspect 	Remote metering stations	<ul style="list-style-type: none"> Disassemble, clean and reassemble, including output blocks, bypass valves and pumps Replace filters, heaters, sensor and o-rings with new parts
Modules	<ul style="list-style-type: none"> Disassemble, clean and rebuild with new parts Replace o-rings, seals, needle/seat, piston and additional wear parts depending on model 	Metering pumps	<ul style="list-style-type: none"> Disassemble, clean and reassemble Replace seals and bearings Remachine pump plates and gears as necessary
Slot nozzles	<ul style="list-style-type: none"> Disassemble, clean and reassemble Precision reground and recoat to wear-resistant coating standard 		

The use of parts from other vendors may invalidate the warranty on your Nordson system because Nordson cannot guarantee the reliable function, quality and safety of non-Nordson components. Although imitation parts may appear to cost less initially, frequent downtime and replacement could eliminate your savings over time.

Equipment support programs keep you competitive.

Nordson provides incentive programs geared to your production.

- Depending on your needs, tailored support programs help facilitate in-plant training, inventory management, troubleshooting, maintenance schedules and hands-on service.
- The Trade Plus™ program provides a worry-free, efficient way to replace major worn components. You receive new parts in exchange for your used Nordson parts.

As a leader in adhesive dispensing equipment, only Nordson gives you innovative application solutions with advanced engineering support, comprehensive support programs, the largest global sales and service team, clear technical documentation and worldwide regional laboratories. Count on Nordson to keep you competitive.

For more information, talk with your Nordson representative or contact your Nordson regional office.
